

Geo-enablement of Tabular Data CAP Grant Status Update

Andrew Turner
CTO, FortiusOne
andrew@fortiusone.com

Status of Functionalities

Open-Source Geocoder

Google Group: <http://groups.google.com/group/geocommons-geocode>

Source Code Location: <http://github.com/geocommons/geocoder/>
(59 Repository Watchers/6 Forks)

Provides geocoding publicly <http://www.geocommons.com>

Afghan Village Data was loaded for use during Afghanistan Elections

Adding Geonames.org Data to provide International Capabilities

Enhancing U.S. Geocoding to accept both string addresses and separated address pieces (address, city, state, ZIP)

Geojoin

Finishing Functionality

Enhancement Plans

Building out Hierarchical Boundary definitions

Test with Grants.gov, Recovery.gov, FPDS, and FCC datasets

Add OGC CSW and WFS standards support

FIPS County Codes

Open the complete description and stats in another window

Now click Continue to see the results.

Your Data	Selected Layer
FIPS county code	County Code
parentcomp_id	Area
carbon 2000	Population 2000
plant_id	Area - Land
city_name	Area - Water
	Population Density
	Timezone

Continue

We will combine your data with the selected layer's geometry using the **FIPS county code** and **County Code** fields.
